

# Azure MFA Integration

## Scope

Enable Multi-factor Authentication (MFA) for customer using procured Azure MFA for Remote Access VPN.

In-scope Vendors: Cisco ASA and Firepower AnyConnect, Palo Alto GlobalProtect, Fortinet FortiClient VPN, CheckPoint VPN Agent, Juniper SSL VPN, Citrix Netscaler and F5 BIG-IP SSL VPN

Maximum Numbers:

- 2x Remote Access VPN concentrators pairs

## Benefits/Outcomes

Increase security posture for remote connectivity by using MFA; this will help further mitigate unwanted remote access, secure the VPN and further prevent break-in attempts to the network.

## Assumptions

- Customer will provide Tesrex consultants with unmetered and unrestricted administrative access and all existing relevant documentation
- Customer will agree change windows with Tesrex consultants and be responsible for all change control approvals
- Customer will complete all required dependencies before the configuration begins; this includes any hardware/software upgrades
- Customer will perform necessary connection, service accessibility and any other deemed necessary testing
- Each change window be a maximum of 6 hours
- All work will be delivered remotely
- No additional feature sets will be enabled or disabled outside of Remote Access
- Customer will be responsible for removing any legacy Remote Access Configurations outside of any clean up related to the MFA configuration

## Deliverables

- Design workshop with customer to align on the environment and planned outcomes
- Perform assessment of current platform to identify the configuration
- Produce High-level Architecture Diagram highlighting the best practice, traffic flow and configuration dependencies
- Provide a list of customer dependencies requiring completion before upgrades
- Perform configuration on Azure Cloud – MFA portal
- Perform configuration on Single Firewall pair
- Perform configuration on further Firewall pair
- Provide training on performing additional configurations

## Cost

£3,900

### Optional items

- Creation of Platform Configured-As Documentation: £3,898
- Follow On Health Check: £2,230

## ► About Tesrex

We're a team of Cisco specialised IT consultants and solution providers based in London. Our goal is to accelerate the adoption of next-generation technologies in the organisations we work with. Everything we do at Tesrex comes down to our ethos; Design. Deliver. Nurture. This core ethos shapes every experience our clients have while working with us.

As a company, our roots first sprouted in San Francisco, USA before we started working in the UK in 2016. Since then we have built a highly-skilled team with diverse knowledge so we can efficiently solve any challenge a customer presents to us and exceed expectations.
