

Firewall Upgrade

Scope

Perform a Firewall platform upgrade consisting of up to 3 pairs of firewalls and 1 pair of Management Devices (assuming all are in High-Availability pairs)

In-scope Vendors: Cisco ASA and Firepower, Palo Alto, Fortinet, CheckPoint, Juniper

Benefits/Outcomes

Firewall platform running on latest stable software which enables the business to operate with minimum service outage and help ensure protection against latest threats where next-generation security is enabled.

Assumptions

- Customer will provide Tesrex consultants with unmetered and unrestricted administrative access
- Customer will provide all existing documentation pertaining to the platform
- Customer will agree change windows with Tesrex consultants and be responsible for all change control approvals
- Customer will perform necessary connection, service accessibility and any other deemed necessary testing
- Each change window be a maximum of 6 hours
- All work will be delivered remotely
- Each upgrade will be performed AS-IS; this means no change in configuration will be made unless required to enable the upgrade to advance. This will be highlighted as a customer dependency
- No additional feature sets will be enabled or disabled
- The upgrade will be in the same software range and will not include any migrations, for example a Cisco ASA to Firepower is not in-scope. This is to remove the complexities with different types of security policies.

Deliverables

- Initiation/Kick-off call with customer to align on the environment, existing and target software versions and upgrade timelines
- Perform assessment of current platform to identify the set configuration, uncover any dependencies and validate upgrade process
- Provide a list of customer dependencies requiring completion before upgrades
- Perform device upgrades in a maximum of 4 change windows

Cost

£6,960

Optional Items

- Additional Firewalls: £1,115 per HA pair
- Onsite Upgrades: from £2,875
- Creation of Platform Configured-As Documentation: £3,898
- Follow On Health Check: £2,230
