

Platform End-of-life Assessment

Scope

Deliver an assessment for end-of-life hardware to document existing usage, future usage considerations and business requirements and roadmap for refresh.

In-scope Vendors: Cisco, Palo Alto, Fortinet, CheckPoint, Juniper

In-scope Products: Firewall, Intrusion Detection and Prevention (IDPS), Proxy, DDoS, Malware Prevention, Web Application Firewall

Maximum Numbers:

- 5 device pairs or different types of configurations

Benefits/Outcomes

A report documenting the current usage, dependencies on future hardware in order to achieve future requirements and a roadmap for refreshing hardware including recommended models and service and training costs.

Assumptions

- Customer will provide Tesrex consultants with unmetered and unrestricted administrative access
- Customer will provide all existing documentation pertaining to the platform
- All work will be delivered remotely
- A maximum of 5 device pairs or 5 types of policy configuration will be assessed. Types of policy could be VPN, Firewall and Web

Deliverables

- Initiation/Kick-off call with customer to align on the environment and planned outcomes
- Perform assessment of current platform to identify the configuration and feature usage
- Execute a workshop for existing challenges and future requirements with customer key stakeholders
- Produce high-level Bill-of-Materials for a refresh, associated services and timelines
- Produce an Assessment Report and Presentation Slide pack aligned with the scope
- Execute a workshop with the customer to review the assessment

Cost

£8,910

► About Tesrex

We're a team of Cisco specialised IT consultants and solution providers based in London. Our goal is to accelerate the adoption of next-generation technologies in the organisations we work with. Everything we do at Tesrex comes down to our ethos; Design. Deliver. Nurture. This core ethos shapes every experience our clients have while working with us.

As a company, our roots first sprouted in San Francisco, USA before we started working in the UK in 2016. Since then we have built a highly-skilled team with diverse knowledge so we can efficiently solve any challenge a customer presents to us and exceed expectations.
